

Principal Characteristics

Length Overall	-	14.02m (46')
Length w/o Bustle	-	11.06m (36'2")
Overall Beam	-	3.1m (10'2")
Draft (@ half-load)	-	0.79m (2'7")
Weight (@ half-load)	-	7.5 tonnes
Fuel Capacity	-	900 liters
Fresh Water Capacity	-	95 liters
Speed (@ half-load)	-	55+ knots
Range (@ 60 knots)	-	200+ nautical miles

P46

Breif Descriptions

Type	-	Twin Stepped Deep-Vee Monohull
Construction	-	Fully Core FRP
Propulsion	-	Yanmar 6LY3 (480 hp @ 3300 rpm)
Option	-	Yanmar 6CXM (500 hp @ 2950 rpm)
Drive System	-	Surface Drives
Propellers	-	NiBrAl, Surface Piercing 4 Blades

The P46 is a high speed craft – perfect for use as a fast pursuit vehicle for patrolling coastal and inshore waters. Its packs enough power to effectively aid policing and to deter illegal activities.

Propulsion : The P46 is built with 480 hp twin Yanmar diesel engines and high performance surface drives to give it a speed in excess of 55+ knots. The P46 can be used in a similar capacity as a P56 , but is designed to patrol inshore for faster intervention.

The Cockpit : Customized based on six individual design requirements, the P46 can be equipped with all the modern amenities for comfort and convenience to minimize the fatigue that comes with working long hours out at sea. It can accommodate up to six crew members but can be operated by a smaller team depending on the requirements of each mission.

Mission Modules : The P46 can be fitted to meet customized requirements, such as triple 50 caliber machine gun mounts. To protect your crew, 17 mm Dyneema® Ballistic NIJ Level III paneling are installed into sides of the cockpit.
